Transit

* Name – Transit

* Training Courses Area - Technology

* Type of training sessions - in-person

* Customer Niche - Workers

* Brand Personality – Fun/Daring

Transit is a company that trains workers in the technological industry or workers who want to transition into tech. Our mode of offering services includes in-person tutorials which takes place in a hub and online tutorials which could cost more but you get to have one-on-one conversations with our highly decorated course tutors. We offer courses in front-end development, UI/UX design, DevOps Engineering and much more. As a company, we are committed to making sure that our students get all the skills they need before launching and that is why before we offer certificates, students from different courses team up to build up a software solution to a problem. We invite professionals from the industry to be the judge of their hard work and handle a seminar to give informed advice to our students. We are transit and we are committed to our students.
